PROFESSIONAL SUMMARY

MERN Stack Developer with 3+ years of production experience building end-to-end web applications for B2B SaaS and EdTech platforms. Proficient across the full JavaScript stack — React.js (hooks, Redux Toolkit, RTK Query) on the frontend and Node.js/Express.js with MongoDB on the backend. Experienced in REST API design, JWT authentication, Mongoose ODM, and deploying full-stack apps with Docker, AWS, and CI/CD pipelines. Proven results: 30% performance improvement, 25% engagement increase, 12% conversion rate lift.

TECHNICAL SKILLS

MongoDB	Document modelling, Mongoose ODM, aggregation pipelines, indexing, Atlas cloud, schema design, population
Express.js	REST API design, middleware, routing, MVC architecture, error handling, input validation (express-validator, Joi), rate limiting
React.js	Hooks (useState, useEffect, useContext, custom hooks), Redux Toolkit, RTK Query, React Router, memoization, component architecture
Node.js	Server-side JS, async/await, event loop, npm ecosystem, JWT auth (jsonwebtoken), bcrypt, Multer (file uploads), Socket.io
Full-Stack	REST API integration, Axios, async data flows, JWT auth flow, optimistic UI, dynamic data tables, multi-role dashboards
Database	MongoDB Atlas, MySQL, PostgreSQL — schema design, relationships, indexing, query optimisation
Frontend	TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Styled-Components, Framer Motion, GSAP, responsive layouts
Testing	Jest, React Testing Library, Supertest (API testing), unit & integration tests, zero production regressions
Tooling	Git, GitHub, Vite, Webpack, ESLint, Prettier, Postman, npm/yarn, VS Code

WORK EXPERIENCE

Full Stack Developer · B4T (Buddy For Travel) — Consumer & Partner Travel Platform	Jun 2026 – Present
<i>React Native · Flutter · Nuxt 3/Vue · Node.js/Express · Laravel/PHP · FastAPI · PostgreSQL · MongoDB · Redis · Docker/PM2</i>	
- Own full-stack delivery across both the consumer-facing website (Nuxt 3/Vue) and native mobile apps (React Native consumer app, Flutter partner app), shipping coordinated features across web and app in parallel. - Maintain the core Consumer API (Node.js/Express) powering authentication, bookings, wallets, carer/seeker matching, payments, and notifications; actively diagnosing and stabilising a production OOM crash loop on the live website deployment. - Built and maintain the Partner Portal (Laravel/PHP) for agent onboarding, job management, finance, and KYC, integrated with a shared PostgreSQL database used across consumer and partner services. - Developed a RAG-based AI support chat system (FastAPI, PostgreSQL + pgvector) with a Next.js admin UI, powering knowledge-base-driven customer support. - Built and maintain internal ops tooling — a React backoffice admin panel, a Next.js content/SEO page editor, and a Node/Vite matchboard tool — all integrating with the core Consumer API. - Manage cross-service infrastructure spanning multiple servers plus a self-hosted WhatsApp messaging API (NestJS/Baileys on Google Cloud Run), coordinating PostgreSQL, MongoDB, and Redis as shared data stores.	
MERN Stack Developer · Coursi Academy — B2B EdTech SaaS Platform	Nov 2023 – Present
<i>React.js · Node.js · Express.js · MongoDB · Mongoose · TypeScript · Redux Toolkit · AWS S3 · Docker · Git</i>	
Built and shipped full-stack product features end-to-end — React.js frontend with TypeScript, Node.js/Express REST APIs, and MongoDB with Mongoose ODM, with complete ownership through release and post-launch monitoring.	

- ▶ Designed RESTful APIs with Express.js — JWT authentication, role-based access control (Teacher / Student / Parent), input validation, error middleware, and rate limiting.
- ▶ Modelled MongoDB schemas with Mongoose — embedded documents, population, aggregation pipelines, and Atlas indexing; achieved 30% performance improvement (Lighthouse & Web Vitals).
- ▶ Integrated AWS S3 for secure course material and profile image storage; deployed Node.js services on EC2 behind Nginx with Docker containers and GitHub Actions CI/CD.
- ▶ Wrote Jest unit tests and Supertest API integration tests; maintained zero production regressions across all shipped features.
- ▶ Collaborated in Agile sprints with product and backend teams — delivered 25% engagement increase and 12% conversion rate lift.

React Frontend Developer • UpMyRanks — B2B SaaS Platform

Sep 2022 – Oct 2023

React.js • JavaScript (ES6+) • TypeScript • REST APIs • Redux • Tailwind CSS • Git

- ▶ Shipped production React features for a B2B SaaS dashboard — reusable components, custom hooks, async data management with Axios, and full ownership through release.
- ▶ Integrated REST APIs and handled complex async data flows — Redux state management, error handling, and dynamic data tables with filters across multi-role admin panels.
- ▶ Resolved UI bugs with root cause fixes using Chrome DevTools and Lighthouse — no regression patches; delivered 25% engagement increase across mobile and desktop.

KEY PROJECTS

School ERP — Full-Stack MERN Admin Panel

React.js • Node.js • Express.js • MongoDB • Mongoose • TypeScript • Redux Toolkit • JWT Auth • Docker • Jest

- ▶ Built a complete full-stack School ERP — Node.js/Express REST API, MongoDB database (Mongoose ODM), and React.js frontend with multi-role views (Teacher / Student / Parent).
- ▶ JWT authentication and role-based access control with protected API routes; bcrypt password hashing and session management.
- ▶ Complex data tables with server-side filtering, pagination, sorting via MongoDB aggregation; real-time notifications via Socket.io; CSV export.
- ▶ Dockerised API service; GitHub Actions pipeline for automated test-and-deploy to AWS EC2.

Coursi Academy — Course Enrolment & Management Platform

React.js • Node.js • Express.js • MongoDB • AWS S3 • TypeScript • RTK Query • Stripe

- ▶ End-to-end MERN course platform — Express/MongoDB API (Mongoose schemas, Atlas cloud) with React SPA using RTK Query for async data management.
- ▶ Stripe payment integration for course enrolments; secure S3 file uploads for video and PDF course materials with pre-signed URLs.
- ▶ Clean REST API design — versioned endpoints (/api/v1/), Joi input validation, async error middleware; documented with Postman collections.
- ▶ 12% conversion rate increase through optimistic UI, skeleton loading states, and API response caching with RTK Query.

LuxEstate Pro — Full-Stack Real Estate Platform ↗ Live

React.js • Node.js • Express.js • MongoDB • JWT Auth • Framer Motion • GSAP • Styled-Components

- ▶ Full-stack real estate platform — Node.js/Express/MongoDB backend (property listings, bookings, agent chat via Socket.io) with a cinematic React frontend.
- ▶ Secure admin dashboard — bcrypt + JWT auth, SHA-256 password hashing, session timeout, property management, analytics, and CSV export.

Porsche Motion Showcase — 3D Car Experience ↗ Live

React.js • Three.js • React Three Fiber • GSAP • Node.js • Express.js • MongoDB

- ▶ 3D car showcase with GLB model rendering, scroll-based GSAP animations, and a Node.js/MongoDB backend for vehicle inventory management and contact form handling.

KEY ACHIEVEMENTS

- ▶ 3+ years shipping full-stack MERN applications in B2B SaaS and EdTech — full ownership dev → release, no regressions, root cause debugging throughout.

- ▶ 30% performance improvement via code splitting, memoization, MongoDB indexing, and backend query optimisation — Lighthouse and Web Vitals driven.
- ▶ 12% conversion rate lift and 25% engagement increase — clean MERN architecture, reliable REST APIs, and responsive UI across all platforms.
- ▶ Deployed production MERN apps to AWS (EC2, S3, CloudFront) with Docker containers, Nginx, and GitHub Actions CI/CD pipelines.
- ▶ Mentored 5 junior developers; enforced code standards via ESLint, PR reviews, and Agile delivery practices.

EDUCATION & CERTIFICATIONS

B.Tech – Mechanical Engineering — Punjabi University, 2018–2021

MERN Stack Development Certification — Besant Technologies, 2022

AWS Cloud Practitioner (in progress) · MongoDB Associate Developer (in progress)
